Comments: ERC performed field surveys of this stream in April and May, 2005. No WBCR was observed at any of the three sites evaluated. The sites did not meet the maximum or average depth criteria. ERC conducted three interviews. Two people stated that they waded in the stream during the summer months. Because of the overall shallow depth of the stream, the committee recommends removing the WBCR designation, however, this stream should be considered for the SCR designation.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
